OhioHealth  
**Infusion Pharmacy**

## WHY CHOOSE US?

With OhioHealth Infusion Pharmacy, patients can manage their intravenous (IV) medication needs in the **comfort of their own home** instead of in the hospital or infusion center.

Home health nurses educate our patients and their caregivers how to infuse their IV medications independently. The home health nurse continues to visit the patient weekly to draw labs and care for the IV site.

### Insurance coverage

We **accept most major insurance plans**. A benefit check will be provided at the time of referral to confirm the requested service is covered for the patient. Payment plans are available for patients if needed.

### Attentive and accessible team

Our **pharmacists are available 24 hours a day**, seven days a week. Our pharmacy team makes regular calls to patients to discuss their treatment course and arrange their medication refills, which are delivered directly to patients at home.

### Interdisciplinary approach

Our pharmacists **work closely with the inpatient and outpatient care teams** to assist in the clinical management of patients. We are available to assist in dosing antibiotics and adjusting TPNs based on weekly lab values.

### Focus on safety

We have **access to Epic**, which allows us to track patients from inpatient to outpatient to **improve the continuity of care and minimize medication errors**. Our pharmacy is accredited by The Joint Commission.

## OUR THERAPIES\*

### Traditional Therapies

- + Antibiotic/antiviral therapies
- + Total parenteral nutrition (TPN)
- + Respiratory medications via nebulizer
- + Cardiac therapies (inotropes)
